

EXTRA CARS FOR  
SALT TAINNew Schedule Will Be Adopted  
on the Road.

TO TAKE EFFECT THIS WEEK

MANAGER LANGFORD EXPLAINS  
TROUBLE OVER PASSES.

BEGINNING this week, the Saltair road will run extra cars to the lake on the regular train for the rest of the season. The number of cars that have been run have been found to be insufficient for the comfort of the passengers, and the increase in the hauling capacity is to be made for that reason.

Manager Langford stated yesterday that the number of cars would be increased to about fifteen each train on excursion days, and sufficient cars will be run all the time to accommodate all passengers without unnecessary crowding. This will be welcome news to those who have undergone the inconvenience of having to stand up while going to or coming from the lake upon occasions when there happened to be larger crowds than usual going to the lake.

On account of the crowded condition, said Mr. Langford, "people have been in the habit of going to the depot fifteen or twenty minutes before train time in order to get seats and, of course, had to sit and wait for starting time. Such waits are disagreeable, and we propose to change the schedule of the train and to run fifteen cars on each train on special occasions, and enough cars will be run at all times to afford all passengers plenty of room and to avoid with the necessity of passengers going to the depot ahead of time in order to get seats."

In speaking of the road and the efforts of the company to serve the public to the best of its ability, Mr. Langford took occasion to explain the company's side of the "pass" matter, which has been the source of numerous protests on the part of the public.

"We issue a pass to a man," said he, "because we know him and have some reason for doing so. We show this courtesy to him, and if he is a married man we simply extend the additional courtesy of asking him to take his wife with him upon that same pass. We do not issue the pass to his wife, but to him, and if he is a married man we simply extend the additional courtesy of asking him to take his wife with him upon that same pass. We do not issue the pass to his wife, but to him, and if he is a married man we simply extend the additional courtesy of asking him to take his wife with him upon that same pass."

Saltair, the coolest place you can find. Round trip 25c.

ODGEN AND RETURN, \$1.00.

Eagles and Foresters, July 13, 1902.

Special train leaves R. G. W. depot at 10 a. m. returning leaves Ogden, 10:30 p. m. Everybody invited. Good time guaranteed.

ARTICLES OF INCORPORATION.

Articles of incorporation were yesterday filed with Secretary of State Hammond by the McCoy Livestock company, which will devote itself to the raising and breeding of livestock.

The company is capitalized at \$15,000, represented by 150 shares of the par value of \$100 each.

Lars Hansen is named as president, Christian W. Hansen, vice president, and Simon S. Jensen, secretary and treasurer. The directorate is composed of the three officials. The principal office of the company will be located at Ogden.

CECIL RHODES' WILL

Provides For Proper Food For Students.

Cecil Rhodes, in his late will, left a bequest of \$50,000 for the improvement of the high table for resident fellows and tutors at Oriel college, Oxford.

I am rejoiced to find that one millionaire has at last given some thought to the question of dietetics in educational institutions," says Elizabeth Cady Stanton in the New York Journal.

"One of the crying evils in our schools, colleges and universities is the bad system employed in feeding young boys and girls."

Dyspepsia is one of the common diseases among the literary classes, and the foundation for this prevalent ailment is laid in our colleges and seminaries. Of what avail is a knowledge of Greek and Latin if the student is unable to digest his food properly?

All this comes from ignorance as to the value of the food element the body must have to supply the vitality of the brain work. Bacon, meat, potatoes, white bread and coffee absolutely will not keep a hard brain worker well. A food expert is needed to perfect food for brain workers.

Not only in the schools but in the home should the food be looked after. The necessity of the food to supply proper nutrition to replace the daily waste of tissue of brain and nerves is of the greatest importance.

Grape-Nuts is the ideal food for young and old who use the brain actively; the diastase of the grains being perfectly developed and the starch transformed into grape sugar in the most perfect manner.

In this condition, Grape-Nuts is ready to be quickly absorbed into the blood and tissue without taxing the digestive organs. It contains the phosphate of potash found in the cereals and this with albumin, supplies the elements required to build gray matter in brain and nerve centers.

Dr. Max Grossman of New York City recently called the attention of the board of education to the fact that "pupils of the defective class are apt to be weak physically. Temporary aberrations are often mistaken for real defects, when they are only symptoms of physical growth, of indigestion or other maladies. Indigestion has been responsible for more than one false lead, and its cure has often been followed by a return to true health."

In its predisposed form, the daily use of Grape-Nuts for the cereal part of the meal, aids digestion, nourishes the body, tones up the nervous system and quickens the mental faculties.

Coffee should also be banished, for it unnaturally stimulates the brain and nerves so that proper nutrition is interfered with and the person cannot get sufficient rest to take the food needed for the work they must do from day to day. For the morning beverage, Postum or coffee should be used in place of coffee.

Let the daily breakfast, particularly at this time of the year, consist of Grape-Nuts, Postum, a little fruit, a cup of Postum Food Coffee, some whole wheat bread and possibly one or two soft-boiled eggs. It is impossible to make one feel healthy, strong and able to work in ten days after getting wrong food and living on scientifically selected food.

IN THE COURTS.

In the district court yesterday morning, John Foster, accused of burglary, was sentenced by Judge Morse to one year in the penitentiary. The prisoner, on May 20 last, burglarized the residence of Albert Bouck, 175 North Fifth street.

In the same court, William Gayler, accused of burglarizing the building of James Stevenson at 60 Commercial street, and receiving stolen goods, entered a plea of not guilty.

ROOT TO VISIT PRESIDENT.

Washington, July 12.—Secretary Root left Washington today to visit President Roosevelt at Oyster Bay, several important matters pending in the war department are to be submitted to the action of the president.

## REDUCING HIS WEIGHT.

Mulvey's Strenuous Attempt to Cut Himself Down 32 Pounds.

There is a \$5 hat at stake that M. E. Mulvey can't walk off thirty-two pounds of his average before the 1st of September. Mr. Mulvey has taken up the wager, and if anyone cares to remain up late enough he may see that well known citizen giving an exhibition each morning of reducing flesh at the rate of two pounds per mile.

It wouldn't be right to give away a secret as to how much Mr. Mulvey weighs, but he would tip the beam somewhere in the neighborhood of the 300 mark. It was a good thing of a good thing to be in this much above the heavy-weight class, and Mr. Mulvey decided to go into training to reduce weight. He selected pleasant prescription, and a class of medicine in mile doses once a day. In other words, he walks home each morning and declares that the seven-pound tramp is better than any anti-fat ever placed on the market.

Harry Harrison, who tips the scale at a high mark himself, wagered Mr. Mulvey that he could not reduce his weight thirty-two pounds by the 1st of September by walking it off. The wager was a \$5 hat, and was promptly taken up. Mr. Mulvey says he will walk two miles a day, and if he has to walk two miles a day, he declares that the treatment has already necessitated a seven-inch shortening of his belt, and of his trousers. He is thinking of getting a patch right on the new "fat cure," if he wins the hat.

Catarth Can Not Be Cured

with LOCAL APPLICATIONS, as they cannot reach the seat of the disease. Catarth is a blood or constitutional disease, and in order to cure it you must take internal remedies. Hall's Catarrh Cure internally and externally. The perfect combination of the two ingredients is what produces such wonderful results in curing Catarth. Send for testimonials. Free.

STATE NEWS "FULLY AWARE  
Of the Excellent Curative Qualities  
of Pe-ru-na."

[Says Congressman Geo. E. Harris From Mississippi.]

A SCARCITY OF WATER.

In Consequence There Is a Poor Outlook For Crops.

Richfield, July 12.—A number of the farmers of this valley are beginning to feel quite uneasy over the outlook for maturing their crops, especially their grain. Nearly all the water of the Otter creek reservoir has been turned out. There is but a small quantity available from other sources. The water has been cut off entirely from the Sevier valley and the Monroe-South Bend canals. There has been no storm to speak of since spring, and unless there is a good downpour soon much of the grain now heading out will not mature. The second crop of lucern will be secured, it is believed, for the ground was pretty well watered with the last irrigation turn.

This condition will quite likely bring on a lawless over-belt. The water-master of the Bullion creek water refuses to divide the water according to Judge Johnson's decree. Under the Judge McCarty decree Bullion creek was given a certain permanent water right, but the parties interested became parties to the latter suit, and it is claimed by the river commissioner, the water of Bullion creek were to be distributed at any season pro rata with other waters. There is a great difference between the two decrees, and it now remains to be established which has precedence. The river commissioner has gone up to Bullion creek to turn down some of the water which is held back, and the creek watermaster will refuse to allow it to be done.

HORSE THIEVES AT WORK.

Two Citizens of Payson Loose Valuable Horses.

Payson, July 12.—The sheriff's office at Payson has been notified today of the stealing at this place of two fine work horses, valued at \$200, which disappeared from the premises of Bell and James Webb yesterday. There were some suspicious horse traders in town during the day, and their apprehension has been ordered.

The pioneers and their sons and daughters of Utah county, about 1,000 strong, will meet here in annual reunion on Thursday, July 24. A banquet will be given them by the citizens of Payson, and a grand love feast and general good time will be had. The day will otherwise be appropriately celebrated in commemoration of the landing of the pioneers into this country.

The city council, in special session Monday night, fixed the tax levy for 1902 at 8 mills on the dollar, which is 1/2 mill higher than the last year.

The high rate for tax for this city is brought about by the building of our large central school building, and it will be a few years yet before the bonds issued for its construction will be liquidated.

George W. Metcalf, the editor and publisher of the Lansing (Ia.) Mirror, and a prominent business man of that city, is spending a month with relatives here.

PROVO NEWS NOTES.

Provo, July 12.—Ed Rice and John Liele, two jewelry peddling tramps were brought down from Cotton to day by Sheriff Storrs. They were charged with robbing horse tourists on the Rio Grande Western of money and a pocket knife Thursday night.

An examination before Justice Cardell of Cotton resulted in the men being held to answer in the district court on a charge of robbery in \$500 bail each, which they failed to give and will be held in the county jail until court opens.

Mathias Maken was sentenced to fifteen days in the county jail for vagrancy yesterday by Justice Pratt of Thistle.

Professor Guy C. Wilson, president of the L. D. S. academy in Mexico, is in Provo. He will remain in Utah during the summer.

The Telluride Power company has ordered 2,000,000 feet of lumber for use in the four-mile flume for the additional 8,000 horse-power, which the company is adding to its plant in Provo canyon. The work will be rapidly pushed to completion.

Apostle Smoot entertained President Smith, Counsellors Winder and Lund and other Salt Lake visitors, together with Provo friends, on an excursion on the lake this evening in the Sargat steamer. The party enjoyed the outing immensely.

A son has been born to Mr. and Mrs. Walter Cox.

Presidents Joseph F. Smith, John R. Winder and Arthur Lund and Apostle Smoot, together with many local speakers, addressed the meeting at the stake conference today. Present Smith spoke earnestly on the question of members of the church joining secret associations.
